Goldenseal root

Cloves

The liver plays a significant role in enabling our bodies to adapt...

Hanna's Formulations

are a result of a lifetime of hands on experience with people's health needs and her deep understanding of the physical and energetic uses of herbs.

There is a synergistic quality in that the whole formula is greater than the sum of its parts.

The liver helps our bodies with the side effects of our modern world.

When we look at the accomplishments of modern culture, we can credit industrialization for advances such as factories, automobiles, and corporate agriculture. On the other hand, we have begun to realize that many of our endeavors have unhealthy side effects, such as pollution, toxic wastes and questionable food additives. Unfriendly substances constantly bombard us. However, human beings always seem to prevail and our bodies continue to withstand amazing abuse, in terms of dealing with contamination. The liver plays a significant role in enabling our bodies to adapt to survive these challenges – specifically to filter out impurities.

THE LIVER

The liver has hundreds of known functions in the body. It aids in digestion by producing bile, breaks down fat, and metabolizes carbohydrates and proteins. The liver also helps to break down toxic substances and keeps the purity of the body intact. It creates important nutrients needed in the body and stores them for months, even years. Kroeger Herb has two important supplements to support this crucial organ.

MILK THISTLE COMPLETE CONCENTRATE™

Milk thistle has been used for centuries to support the liver and gall bladder, and research on the concentrated extracts has been very exciting. Silymarin is the group of flavonoids in milk thistle that may be responsible for a number of positive liver functions. Studies indicate that Silymarin supports the liver's ability to cope with impurities.

LIVER FORMULA™ HERBAL COMBINATION

Hanna Kroeger developed this combination based on traditional liver-friendly herbs. This formula contains the perfect blend of Goldenrod, Goldenseal Root and Cloves. All these herbs have been used traditionally to support the liver in many healing practices. Goldenseal contains the constituent berberine that research has found to have favorable effects on the liver.

Thus, taking this dynamic duo – Milk Thistle Complete Concentrate and Liver Formula Herbal Combination, in tandem – will provide all the strength your liver needs to filter out the various pollutants and impurities of our modern world. ■
